

Thank you for your interest in signing this petition, which has now been signed by more than 30,000 American scientists. Signatories to the petition are required to have formal training in the analysis of information in physical science. This includes primarily those with BS, MS, or PhD degrees in science, engineering, or related disciplines.

Please print the petition, fill out the credential section, and sign as indicated.

Please mail your signed petition to: Petition Project, P.O. Box 1925, La Jolla, CA 92038.

Best Regards,

Petition

We urge the United States government to reject the global warming agreement that was written in Kyoto, Japan in December, 1997, and any other similar proposals. The proposed limits on greenhouse gases would harm the environment, hinder the advance of science and technology, and damage the health and welfare of mankind.

There is no convincing scientific evidence that human release of carbon dioxide, methane, or other greenhouse gases is causing or will, in the foreseeable future, cause catastrophic heating of the Earth's atmosphere and disruption of the Earth's climate. Moreover, there is substantial scientific evidence that increases in atmospheric carbon dioxide produce many beneficial effects upon the natural plant and animal environments of the Earth.
